SCIENTIFIC ORGANISATION

Guiding principles

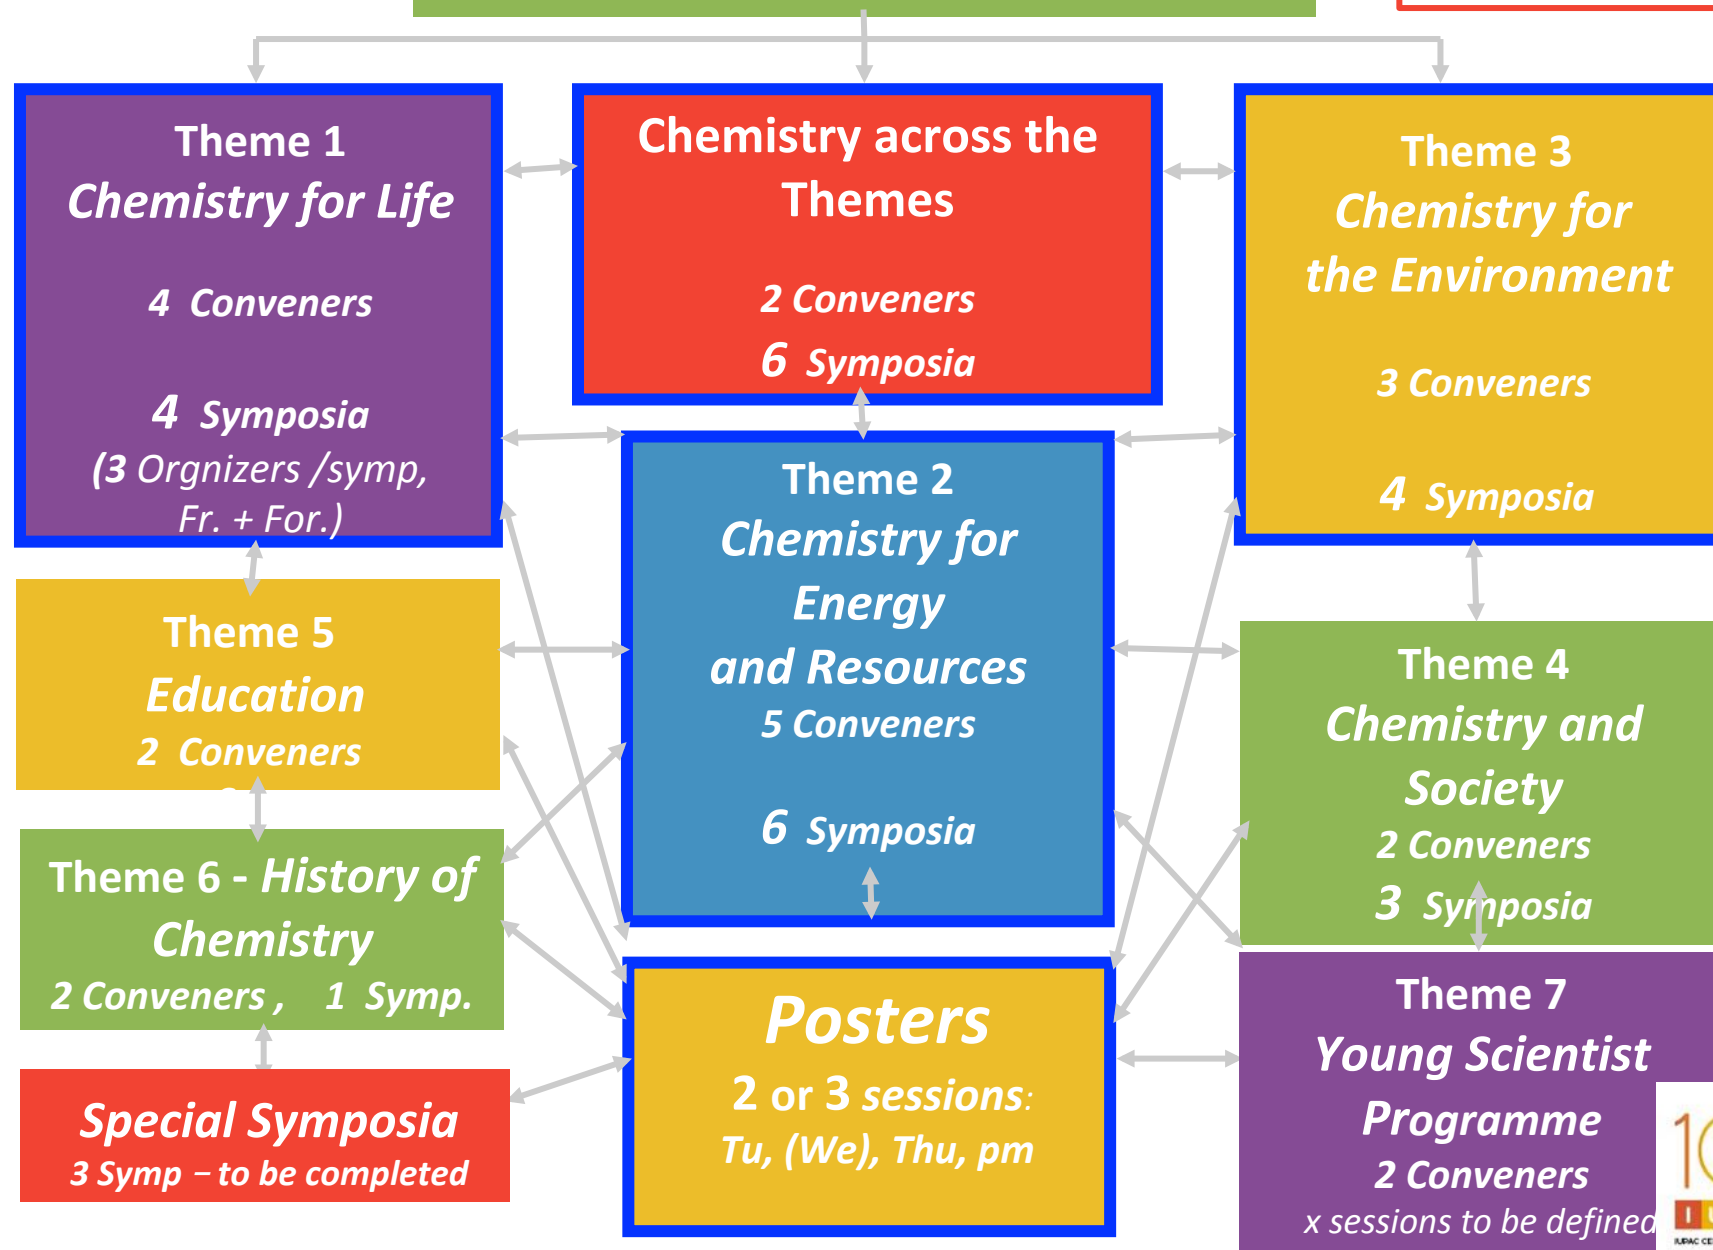

- Limited number of *interdisciplinary main themes*.
- Themes broad enough to cover *most of the chemistry domains*.
- Only *3 to 6 symposia per theme* to avoid dispersion of the audience and the forth and back rushing.
- Both *academic* and *industrial* aspects considered in the symposia.
- *Young Scientists* Programme, organized by themselves.
- Specific Symposia for «*Chemical Education*», «*Chemistry and Society*», «*History of Chemistry and IUPAC*», «*Gender Gap in Sciences*», etc..
- Symposia proposals established by a restricted executive group (theme conveners) and *submitted for review* to the Programme Committee and IAB.
- Programme Committee composed of a majority of *Foreign scientists* including the *IUPAC Divisions/Committees chairs*.

YOUNG SCIENTISTS PROGRAMME

...AGAIN A TOUCH OF GLOBALISATION

- 1- All along the Congress, series of talks and round table talks related to “early carrier” chemists (EC)’ interests and issues will be organized in parallel (*controlled overlapping*) with regular symposia:
proposal and article writing skills - research and project management – scientific outreach and communication - networking with academic and industrial partners -, etc...
- 2- A dedicated space at the Convention Center will be available for Young Scientists (EC and youngers) for,
own meetings - networking activities - interaction with potential employers from industry and academy - CV clinics and soft skills tutorials -, etc...
- 3- An YS Celebration of IUPAC100 on the evening of Wednesday July 10, 2019 at Maison de la Chimie (main auditorium),

gathering of Congress foreign YS participants with the YS from broader Paris area – Talk by a renowned guest speaker – Dinner (or buffet).
