

Christmas 2022 at ICMAB

**Wednesday, 14
December 2022**
ICMAB-CSIC

Programme

SEMINAR ROOM "CARLES MIRAVITLLES"

10:30 Conversations: Seniors vs Juniors

Young researchers will have the opportunity to interview some of the senior researchers of the Institute: Xavier Granados, Clara Viñas and Francesc Teixidor.

Was it different to do research 30 years ago? How did you start at ICMAB? How has materials science changed during these years? Was it difficult to secure a position? What would you recommend to those who are now starting in this area?

11:15 Some words...

Words in honor of Xavier Granados by some of his colleagues

Xavier Granados has worked many years with superconductivity materials and big energy installations. Before coming to ICMAB he was a highschool teacher.

Words in honor to Clara Viñas by some of her colleagues

Clara Viñas has worked many years studying the boron chemistry, lately for biomedical applications. She is chemist and pharmacist, and before coming to ICMAB she worked in the industry.

Words in honor to Francesc Teixidor by some of his colleagues

Francesc Teixidor has also worked with the boron chemistry, especially for catalysis and energy Applications. Before coming to ICMAB, he was university professor at the UAB.

Words from our Direction team

Which Direction team will talk? Surprise.

11:45 AM: Concert by the Companyia Minimíssima

Poetry-science recital with accordion in homage to ICMAB researchers who retire this year.

ICMAB OUTDOOR TERRACE AND GARDEN

12:30 Christmas Carols with the ICMAB Choir

The ICMAB choir will sing some Christmas songs.

12:45 Christmas Lunch

Christmas lunch at the Institute garden and a toast for the year 2023 with cava and torrons. Stay warm.

*There will be a small present for all attendees.
This event is in-person only.*
